LINGERIE

1. INTRODUCTION:

Women's undergarments are collectively called Lingerie. The products are also individually called Bra, Panties, Slip, Brassiere etc. Growing income levels and continuous launch of fashionable products has also impacted Lingerie. Now days, these garments are designed to be more attractive, highly functional and comfortable to the body.

2. PRODUCT & ITS APPLICATION:

Lingerie provides support and shape to parts of women's body and therefore plays an important role in her look & personality. There is also need for these garments to be skin friendly for hygienic reasons.

3. DESIRED QUALIFICATIONS FOR PROMOTER:

Graduate in any discipline.

4. INDUSTRY OUTLOOK & TRENDS:

There is a growing awareness among female population to spend well on own hygiene, looks, gait and attire. More and more women aspire to buy and use good quality and sometimes branded and/or expensive lingerie products. Government's push to women's education, constant urbanization and increase in proportion of working women are other factors that fuel the spending on lingerie. The trends shall continue for next couple of decades.

5. MARKET POTENTIAL AND MARKETING ISSUES, IF ANY:

The market for Lingerie is as large as female population. What is important is that the awareness to spend on and care for lingerie is increasing day by day. Several manufacturers and online marketers of lingerie have reported growing sales of these products in tier II and tier III cities as women of smaller towns have dreams and aspirations but are unable to find products of their choice in such places. Therefore the potential for these products is very high. The entrepreneur has to be creative enough to achieve high degree of design, look and style at affordable price in order to achieve a higher market share.

6. RAW MATERIAL REQUIREMENTS:

The main raw material is light weight fabric made from fine count of cotton yarn. Sometime synthetic fiber is also used in lingerie but it less preferred in hot and humid weather in most parts of India. Cotton fabric with little Lycra is the most ideal fabric to provide good fit and comfort in lingerie. Variety of cotton fabric is available in all major cities. Lace for floral designs and borders is also easily available with traders dealing in tailoring materials or dress materials. Elastic for waist in the panties and shoulder straps in the bra as well as hooks & eyes for bra are available with textile accessories dealers.

7. MANUFACTURING PROCESS:

The fabric purchased in roll form is spread in layers on the cutting table. Patterns of various parts of the garmentmade out of card board or plywood or metal are laid on the fabric in such a way that wastage of fabric is minimized. Several layers of fabric are then cut through vertical motorized blade. Garments are stitched in assembly line manner wherein each machine operator completes only a part of the product. The stitching starts on the 1st machine and gets completed at the last stage where the product is inspected for quality defects if any. Garments are then cleaned of loose yarn or dirt and packed in plastic bags as per customer requirements.
